

EVRIHOLDER PRODUCTS EXTENDS KITCHEN SPACES™ LINE OF FRIDGE ORGANIZERS

ANAHEIM, CA, March 9, 2018 – Evriholder Products is proud to announce the line extension of our **Kitchen Spaces™** Fridge Organization System. **Kitchen Spaces™** bins reduce spills and bring organization to your refrigerator. Each bin provides the perfect solution to separate, store and keep your food fresh. These stackable, versatile bins help maximize space and are customizable.

The **Kitchen Spaces™ Colander and Twin Colander Bins** are the perfect solution to store fresh fruits and veggies, creating an easy way to serve fresh healthy food to your family. The fresh food baskets replace grocery store plastic disposable baskets with a functional, eco-friendly, and economical way to store and serve fresh veggies to your friends and family.

- The inner basket can be removed and used as a colander for easy rinsing while the basket design allows air to circulate all around, keeping food fresh in the fridge and on the counter.
- Use the basket to easily store and serve fresh berries, cherry tomatoes, grapes, and other favorite produce from the garden or market.
- Colander Bins are the best choice for the recycle-conscious consumer and are BPA free to ensure years of safe use for the whole family.

Now that we've organized your refrigerator how about your pantry?

Pantry Organizers by Kitchen Spaces™ provide a way to organize unique items in your pantry. The selection ranges from small bins for keeping sugar packets in one place to large bins for storing your favorite cake mixes. The **Coffee Pod Bin** has 15 slots to store your favorite brew of coffee. Our **Tea Bag Bin** has a 4-section divider to store all of your loose leaf and bagged tea.

Kitchen Spaces™ - What makes a kitchen great is how you organize it!
